EXCELLENCE IN EQUIPMENT

CB 120-1000 RPM

Cosmeco **double-wheel ditchers** are the strongest machines Cosmeco produces, essential when it comes to working on long distances, they guarantee a top-class performance even when faced with the hardest tasks. Their sturdy wheels, equipped with knives and blades that cut, dig and clean both sides of medium and big channels, work well **both on sandy and clay soils**. The earth that gets removed is then thrown equally on to both sides, the operator can choose whether to have it projected several yards away or to have it fall near the ditch borders, thus creating small levees on both sides and by doing so diminishing working cost and time.

Main Strengths:

- Eliminates the operations of levelling piles or ridges of dirt left by scrapers, bulldozers and excavators
- Top-notch performances even with residue deposited at the bottom
- Adjustable hoods for removed soil management
- The light-weighted frame doesn't compromise the total weight of the machine, even on the off chance of being filled with earth
- Transmission with gearbox with oil-immersed gears
- 2nd category three-point hitch (standard)
- Adjustable depth through the tractor hydraulic lifting system
- To excavate of a new ditch, more passes may be required, depending on the soil consistency and the desired depth.
- The frame is fixed, it works only in a central position

•**Game Equipment stocks repair parts for the ditchers.**

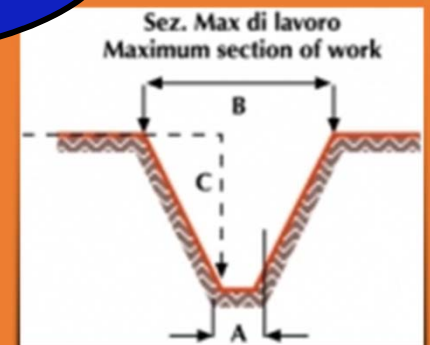

Current Price:

\$27,280.00

(tax and shipping/handling not included)

R.P.M. 1000
 Hp 75/90
 M/h 0.2 – 0.4 (Km/h 0,3 - 0,7)
 Lbs. 2161 (Kg 980)
 Ditch maximum size
 A: 15" (38 CM), B: 71" (180 CM),
 C: 49" (125 CM)
 Wheels lead angle 32°
